## ***WADE INTO THE WAVES.***

Tide Rider is an analog tremolo pedal that encapsulates the wobble and wave of a vintage tube amplifier while allowing musicians to push this classic effect into futuristic territory. It features a transistor-based tremolo circuit coupled with a wide range LFO that is capable of both wildly fast and ridiculously slow modulation. Speed and Depth knobs provide sounds that range from subtle to extreme in both rate and overall intensity. These traditional controls are joined by a push button toggle switch that changes the speed range of the LFO to allow for dramatic raygun and AM synthesis effects when turned all the way up.

# EXPLANATION OF CONTROLS

- 1** **Depth:** Sets the intensity of modulation.
- 2** **Speed:** Sets the rate of modulation.
- 3** **Speed Range:** Sets the range of the Speed knob. Green = slow. Red = fast.

Tide Rider requires a negative tip, 9VDC power supply.  
Tide Rider does not take batteries.
